

STONEX MACHINE CONTROL SOLUTION

STX-DIG

Machine Control Solution for Excavators

Stonex machine control solutions can be installed in most earthmoving machines quickly and easily. The simple design of the solution allows you to be up and running in no time.

Thanks to the Android software developed by Stonex, all the components can easily communicate with each other. As an option there is the possibility of having a bluetooth connection between the various components of the system. The software allows you to manage all phases of excavation and machine movement.

The system is scalable as needed. It is possible to install a 1D/2D solution and then easily transform it into 3D.

Android system

Optional bluetooth communication

High accuracy solution

Easy to use system

STX-DIG FEATURES

The control of an excavator is a very delicate operation in all phases of work.

In order to operate quickly and effectively, it is necessary to monitor all the movements of the machine in a precise manner.

The system developed by Stonex is equipped with high-precision motion sensors that provide real-time information on the status of the machine.

The information is sent to the Android tablet installed in the cabin. The tablet is equipped with Stonex software developed specifically for the world of machine control.

Benefits of our solution:

- Precise results
- Reduction of costs
- Productivity increase
- Increase in the quality of work
- Simplified construction site management

Applications:

- Construction sites
- Roads
- Railroads
- Parkings
- Airports
- Landfills
- Landscape management

...and many more
